

Modernizing UX

Smarter Calls, Lower Costs: A Virtual Agent Proposal for Za Pizza

From legacy DTMF to intelligent voice experiences – English & Spanish

Presented By Jai

The Cost of Standing Still

150 agents • 95% human-handled • 3.5/5 CSAT

	<u>Baseline</u>	<u>Goal</u>
AHT (Seconds)	300	↓
Abandonment Rate	15%	↓
Avg. Wait Time (Seconds)	100	↓
CSAT (1-5)	3.5	↑
Agent Handled Rate %	95%	↓
Cost per Contact	\$5	↓

Baseline figures based on Za
Pizza 2025 operational averages

Your Next Six Months with a Virtual Agent

	<u>Baseline</u>	<u>Virtual Agent – Months 1-2</u>	<u>Virtual Agent – Months 5-6</u>
AHT (Seconds)	300	250	175
Abandonment Rate	15%	8%	4%
Avg. Wait Time (Seconds)	100	40	25
CSAT (1-5)	3.5	3.5	4.4
Agent Handled Rate %	95%	65%	40%
Cost per Contact	\$5	\$3	\$2

Baseline figures based on Za
Pizza 2025 operational averages

*Faster calls. Lower costs. CSAT protected
and rising.*

Proven in Pizza

Real Results from Virtual Agents

Our projections are grounded in real results from your industry. These brands are already there:

Industry-wide: AI voice agents now deflect 45–60%+ of inbound customer queries (Freshworks, 2025)

Jets Pizza

92% AI order completion rate
(HungerRush OrderAI, 10M+ orders)

Dominos

70% faster resolution time via virtual assistant
(Yellow.ai)

Taco Bell / Yum Brands

2M+ voice AI orders across 300+ US locations
(Q3 2024 earnings)

Sources: HungerRush/QSR Magazine (Jet's Pizza), Yellow.ai case study (Domino's), Yum Brands Q3 2024 earnings call, Freshworks CX Report 2025

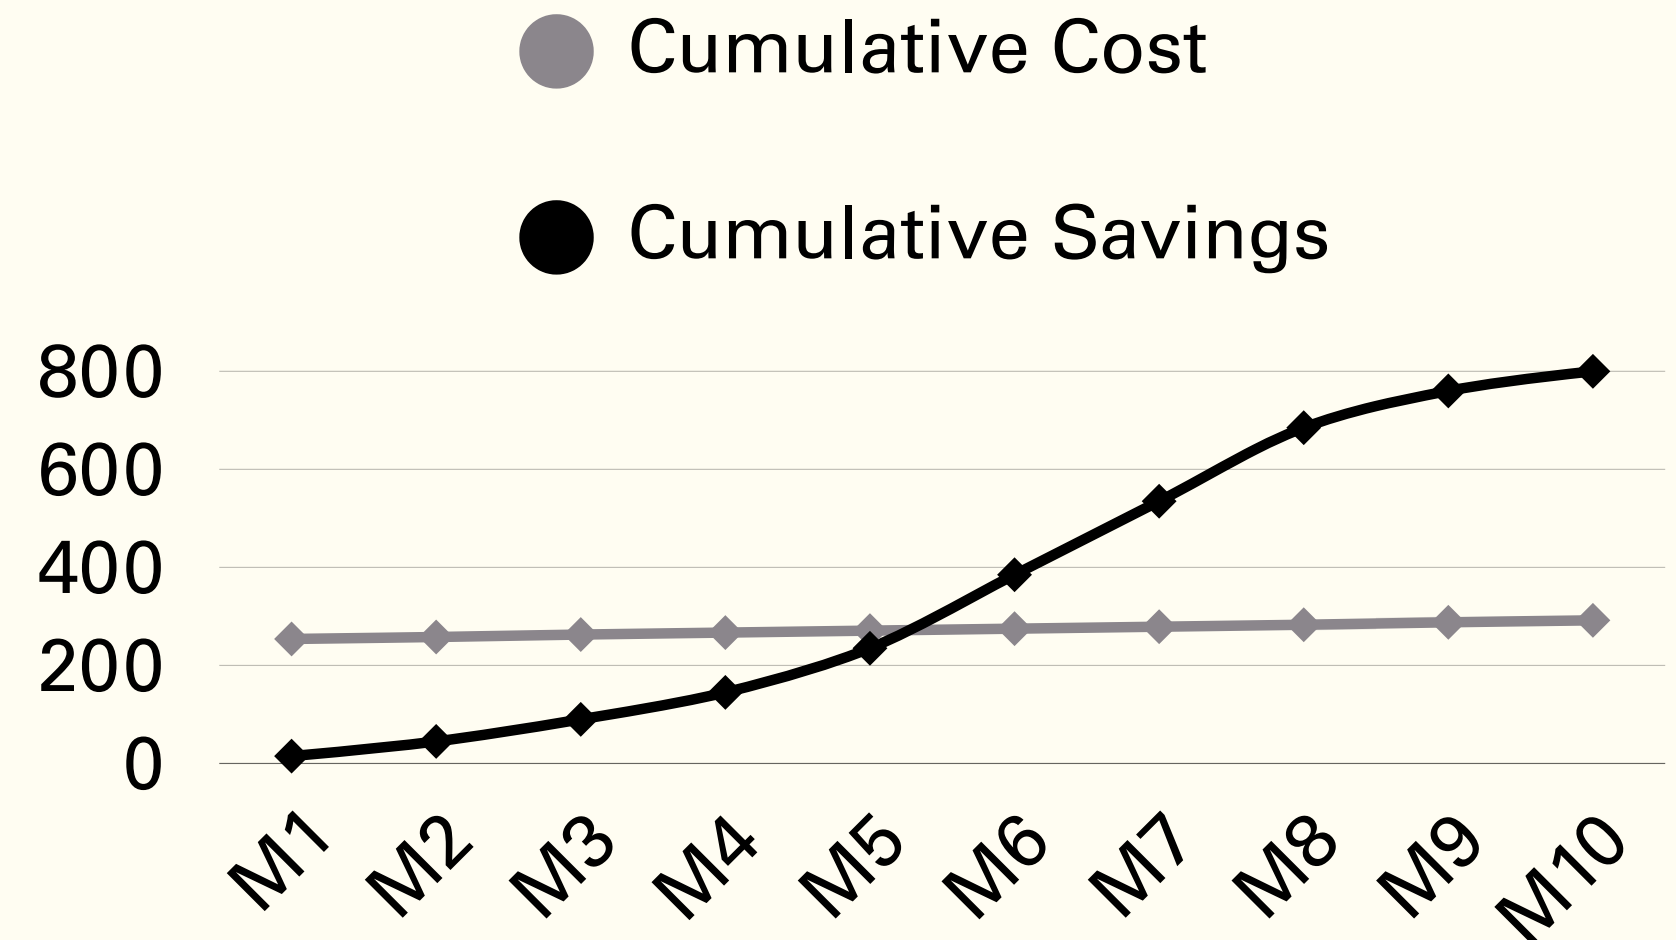

Clear ROI: Financial Impact of Virtual Agent

Investment Overview

Implementation Costs (one-time)	\$250K
Ongoing Annual Costs	\$50K

Projected Annual Benefit (Month 5-6)

- Operating Cost Savings (AHT + deflection): \$2.7M
- Revenue Recovered (reduced abandonment): \$1.0M
- Gross Annual Benefit: ~\$3.7M
- Net Year 1 (after implementation & ongoing costs): ~\$3.4M

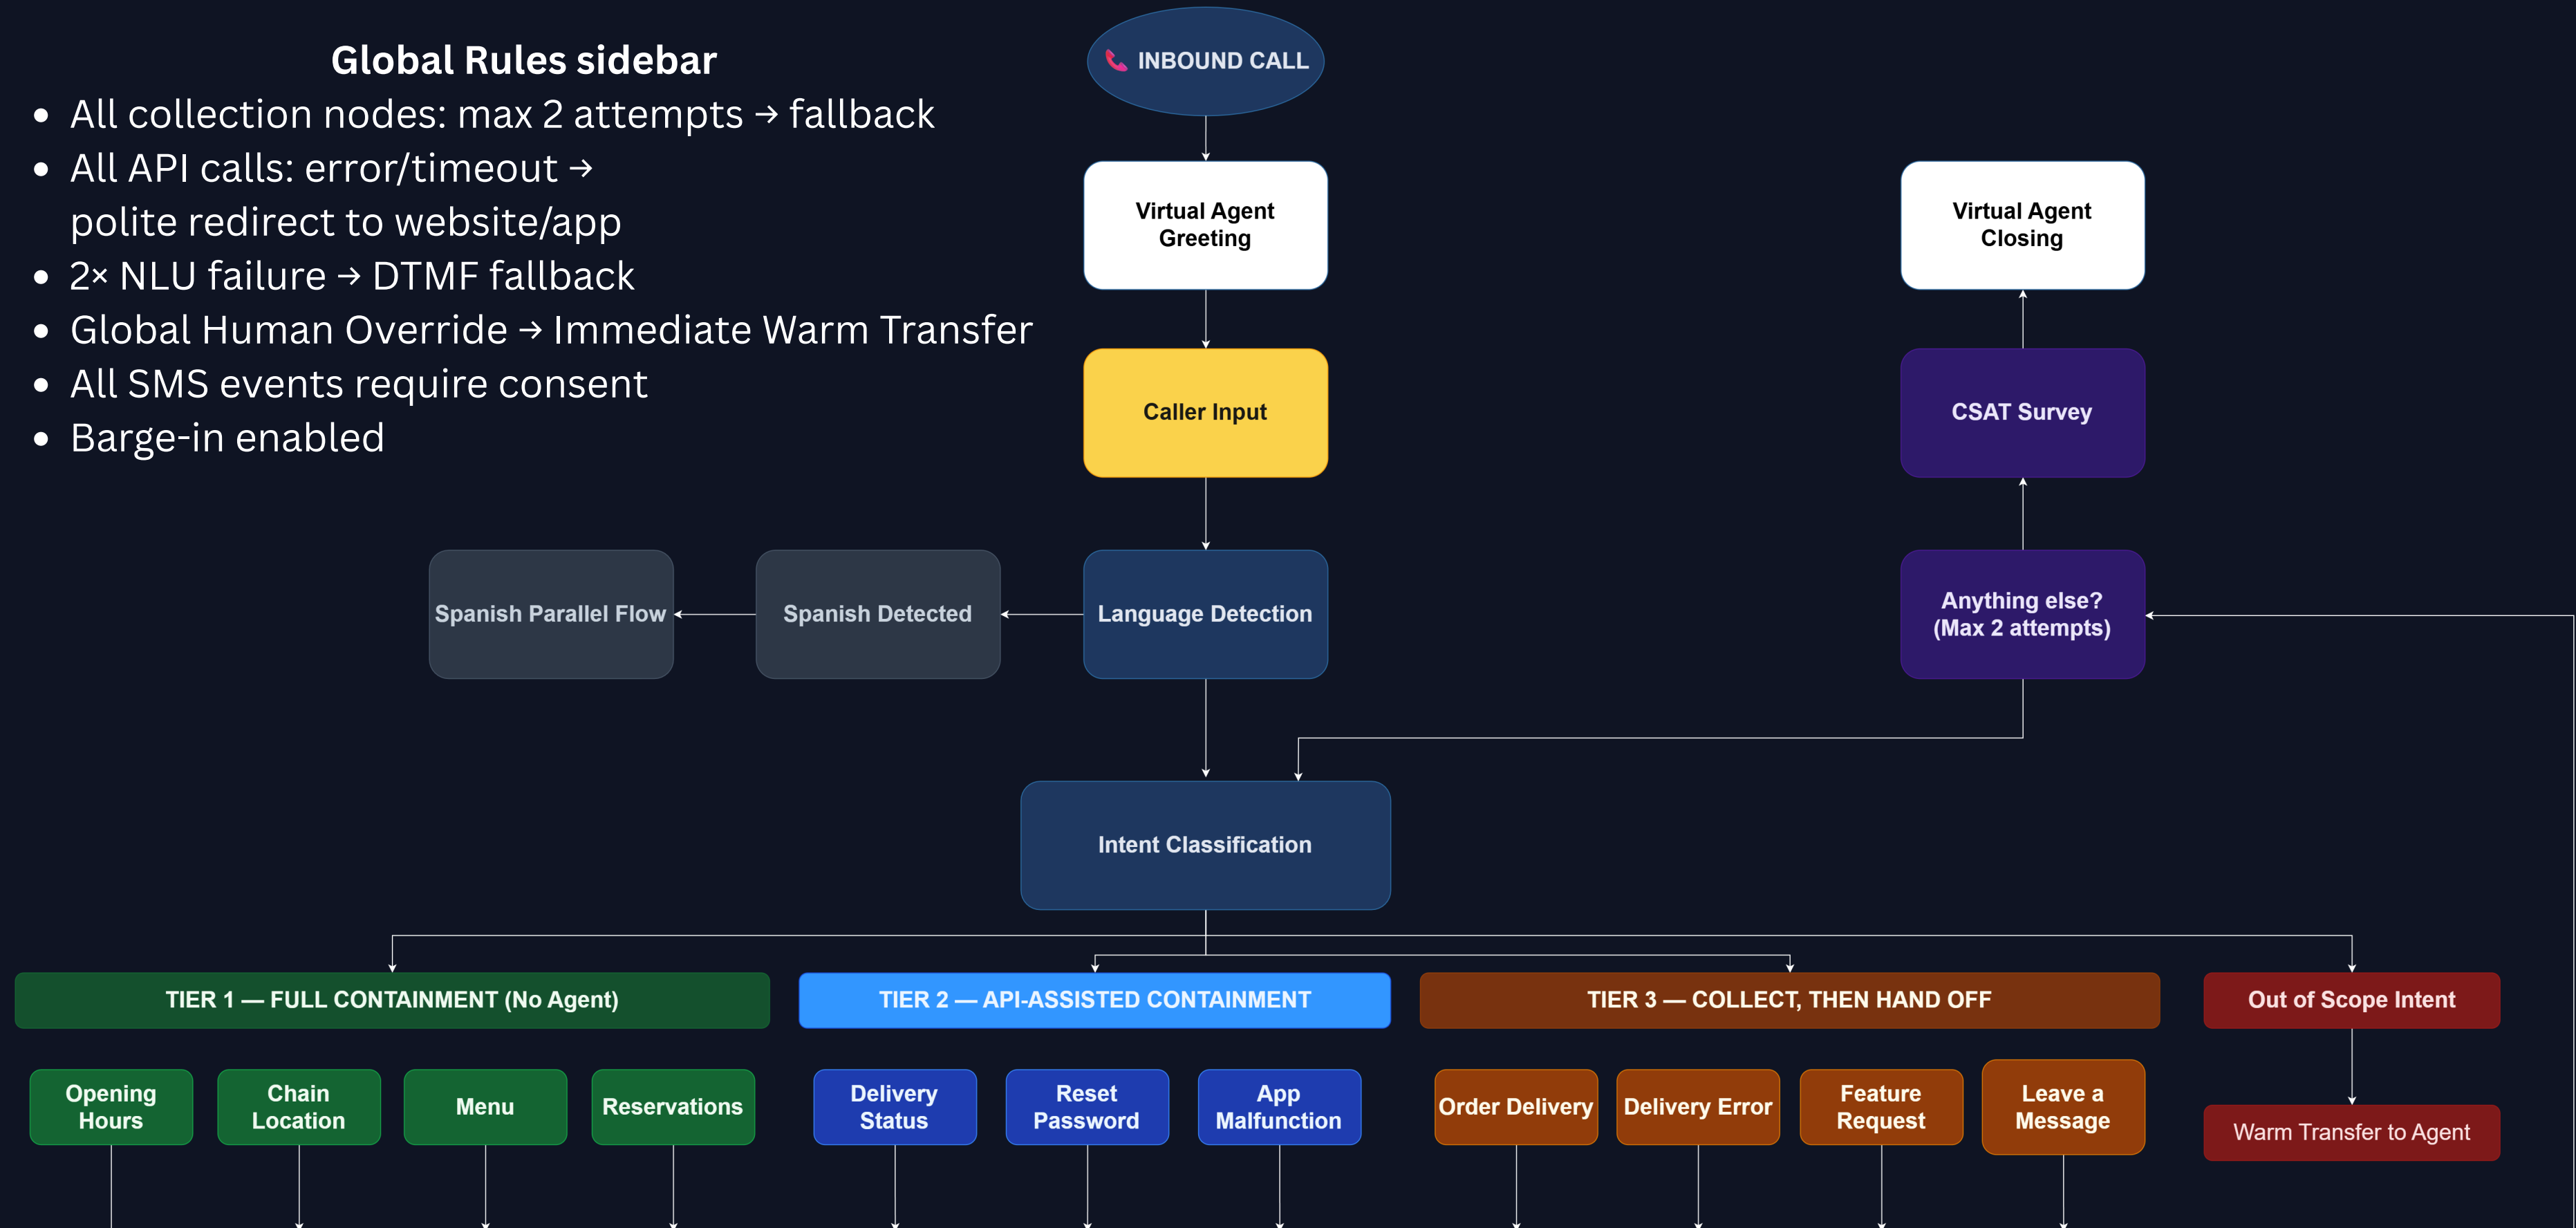

Based on Za Pizza current scale: ~75,000 monthly calls (150 agents), \$5 baseline cost per contact, and POC performance data. Revenue recovery assumes ~\$25 average order value and 40% conversion on recaptured calls. Conservative estimate shown; actual results depend on adoption and call mix (English/Spanish).

Architecture Overview

Global Rules sidebar

- All collection nodes: max 2 attempts → fallback
- All API calls: error/timeout → polite redirect to website/app
- 2× NLU failure → DTMF fallback
- Global Human Override → Immediate Warm Transfer
- All SMS events require consent
- Barge-in enabled

The Growth Roadmap

Personalization & Loyalty

Repeat caller recognition, previous order surfacing, one-click reorder, loyalty auto-applied

~15–20% increase in repeat order rate →
est. +\$400K–600K/year revenue uplift

Proactive Outreach

OMS-triggered outbound status updates, eliminates inbound delivery status calls before they happen

Removes ~15–25% of total inbound volume → ~\$150K–240K/year additional savings

Autonomous Error Resolution

VA validates complaints against OMS, issues instant credit/coupon without agent

Eliminates highest-cost call type → ~\$80K–120K/year + CSAT protection

Live Intelligence

Real-time busyness query, kitchen-load aware ETA, POS/KDS direct integration

Reduces post-order anxiety calls ~10% → ~\$50K–75K/year

Platform Consolidation

Migrate legacy DTMF to Vonage – single platform, lower licensing, seamless

~\$120K–180K/year in platform cost savings

Next Steps

Approve Phase 1 Budget: \$250K

Confirm IT/System Access

Assign internal project owner (IT + Ops lead)

Timeline: Sign off by April → Go-Live by May
